

### Giant Bubble mix with Glycerin

6 Cups Distilled water

½ Cup Blue Dawn Detergent Original works best but Ultra seems to be the one that is most easily found

½ Cup Corn Starch

1Tsp Baking Powder

1 Tblspn Glycerin

Dissolve the corn starch in the water in a large container, stir really well. Stir the rest of the ingredients into the mix but be careful not to create a froth. Some of the corn starch may not dissolve but as the mixture sits, give it a stir now and again. Leave it sit at least an hour or two. I like to make it a few days or week till I use it. But an hour will work.

### Bubble Mix with Guar Gum

1 heaping tablespoon Guar Gum

One 28 oz container of Dawn

Mix this mix very well to be sure it is well mixed in a large container.

Slowly add 3 gallons of Distilled water, you want to stir the mix but not make a froth.

Add 3 Tablespoons of baking powder, stir in slowly and mix well.

This is the hard part, wait at least an hour. Have fun.
