

HOW WE'LL HAVE A SAFE SUMMER CAMP IN 2021!

PRE-CAMP PREPARATION

Participants are encouraged to limit exposure/contacts and monitor health/symptoms for ten days prior to arrival at camp

PRE-SCREENING

All participants will be required to pre-screen for COVID symptoms/exposure prior to departure for camp

DAILY HEALTH SCREENING:

Participants will be screened upon arrival at camp, and daily health screenings by unit leader/parent will be required for all participants

HANDWASHING & SANITIZING

Increased focus/reminders and availability of handwashing and/or hand sanitizing around camp

OUTDOORS

Being outdoors when at all possible is a priority. This includes modifying programs and food service to limit indoor space usage.

MASKS

All participants are required to wear face mask when indoors or when social distancing is not possible. Exceptions include eating, swimming, & sleeping

MODIFIED PROGRAMS

Some camp programs, activities, and schedules will be adjusted to limit large gatherings and close contact

ADJUSTED FOOD SERVICE

Food service will be altered to limit use and/or capacity of indoor spaces, such as dining halls. Shared areas, such as salad bars, will be modified. Options vary by camp.

SMALL GROUP/PODS

Camps may utilize small group "pods" to limit mixing of groups and reduce risk of exposure/transmission
